PROFILE

Experienced in building Cross-platform mobile application and web application

Developed over 20 Applications with React Native and Nodejs that's currently running locally and internationally and experienced in publishing to Playstore and Appstore

Experienced in working remotely with local and foreign team and client

Seeking opportunities to leverage my skills and expertise in a dynamic and collaborative team environment

EXPERIENCE

Project Teams Leader / Developer | **AXRA Technology**

September 2021 – Present

Yangon, Myanmar

- Worked as a full stack developer for gathering requirements, designing and developing mobile applications using React Native
- Developed various mobile application such as mobile wallet, POS, ecommerce, fitness, ERP, etc
- Handled publishing applications to Google Play Store and Apple App Store and resolved reviews
- Developed application backend server using NodeJs, ExpressJs, MySQL, Sequelize ORM.

Senior Software Engineer | **Smart Creative Intelligent Technology Philippine**

June 2022 – Sept 2024

Philippine, Remote

- Test, develop and maintain applications for POS, vending machine, PDA devices remotely using TeamViewer and Anydesk
- Gather project requirements from clients and stakeholders, create project timeline, analysis project and risks.
- Mentor and monitor junior developers and team members for best practice like better code and folder structure, API and database design, etc
- Implemented and integrated with GraphQL api, payment gateway, eKYC services, gps tracking system, biometrics securities, NFC, Java Card, POS devices, etc
- Built backend proxy server for payment gateway and transformed legacy SOAP API to REST API and integrated with React Native Application.
- Developed the transportation system and other application that's currently running in Philippine

Frontend Developer | **Hydro Plant**

November 2020 – July 2021

Yangon, Myanmar

- Designed and built web application with ReactJs, Redux Hook, Material UI framework and Cordova for porting web app to cross-platform mobile application
- Integrated and managed Amazon S3 service
- Maintained the user acceptance test (UAT) Amazon EC2 server for deploying and testing updates.
- Shared knowledges and trained coworkers about the latest technology like React, GraphQL, Nginx, Github Action CI/CD, etc

Freelance Developer

 May 2020 – August 2020

 Yangon, Myanmar

- Built a e-commerce and CMS website using Java (Spring boot) framework, MySQL (Hibernate ORM) and AngularJS
- Developed the front end UI and internal websites as well as challenging back end API server code.
- Integrated and managed the AWS cloud services such as EBS, EC2, RDS, SES, S3, Route 53 and calculated the service costs for future usage
- Delivered the bug fixes and updates in minimum time frame

EDUCATION

Bachelor of Engineering (Information Technology) | [West Yangon Technological University](#),

 2014 - 2020

 Yangon, Myanmar

Diploma in Professional Java Programming | [India-Myanmar Center for Enhance Skills](#)

 2019 – 2020

 Yangon, Myanmar

Portfolio Projects

App Name - ORO Wallet

- Cross platform mobile wallet application made with react native for transportation that's currently running in the Philippines.
- Developed with React Native and integrated with the payment gateway proxy api with nodejs. Implemented qr reader, biometric reader, eKYC service, and nfc scanner for Java card (ISO 7816)

android

<https://play.google.com/store/apps/details?id=com.aici.owallet>

ios

<https://apps.apple.com/sg/app/oro-wallet-app/id1603281764>

App name - ALPHA MM

- ERP application that's used internally for Alpha International Company, intended for smooth interacting, delivery and management for working with wholesalers, resellers, etc.
- Managed the entire application development using React Native and Nodejs, GraphQL for backend.

android

<https://play.google.com/store/apps/details?id=com.axratech.alphamm>

ios

<https://apps.apple.com/us/app/alpha-mm/id6569254469>

App name - GRPOS

- The prepaid card POS system developed for the Golden ROC Hotel Group was used in hotels, spas, restaurants, and more
- Developed mobile application for android based POS device and prepaid card using Mifare Classic NFC cards

Project name - Advanced Metering Infrastructure

- Currently leading team and developing AMI system that's was going to be used in Myeik islands
- Project involves in developing mobile app and system using IOT devices

App name - Power Play

- A mobile app that allows users to purchase exercise videos and track their workouts and monitor their progress.
- The app was built using React Native, GraphQL, and integrated with facebook login, apple login, in-app purchase, firebase for push notification

android

<https://play.google.com/store/apps/details?id=com.axratech.powerplay>

ios

<https://apps.apple.com/us/app/power-play-fitness/id6444821979>

App name - V.Jun

- Ecommerce application from V.Jun, a local well known mobile phone accessories shop.
- Created the whole application with react native and integrated with graphql api
- Added popular features like in-app cover customization feature where users can select their own photo, change color and add stickers.

android

<https://play.google.com/store/apps/details?id=com.vjun>

ios

<https://apps.apple.com/us/app/v-jun/id1617216233>

App name - Pann Sine

- An ecommerce application that sell flower, plants, gardening tools, and provide floral service for a locally opened shop that's located at the National Kandawgyi Botanical Gardens
- Managed the entire application development using React Native and Nodejs, GraphQL for backend.

android

<https://play.google.com/store/apps/details?id=com.pannsine>

ios

<https://apps.apple.com/in/app/power-play-fitness/id6444821979>

App name - Shwe Padauk Taxi

- Shwe Padauk Taxi application that's currently running and used by thousands of drivers. Popular for convenient and costing less than Grab in Myanmar
- Managed the project for adding new features and training junior developers and gave guidelines for development.
- Developed a new SPTS Customer application that's going to launch soon. Used React Native and integrated with Rest API, device gps

android

<https://play.google.com/store/apps/details?id=com.shwepadauktaxi.app>

App name - My EV Myanmar

- Cross platform EV application where users can search nearby ev station and navigate to charging station
- Developed backend with ExpressJS and application using React Native

android

<https://play.google.com/store/apps/details?id=com.axratech.myev>

ios

<https://apps.apple.com/us/app/myev-myanmar/id6470975492>

App name - Joy My Puppy

- Application made for pet owners for booking nearby pet spa using gps, multi-vendor ecommerce, social media community feature,
- Developed both backend and front end with Nodejs, Postgres, React Native, React.

android

<https://play.google.com/store/apps/details?id=com.axratech.joy>

ios

<https://apps.apple.com/us/app/joy-my-puppy/id6475634062>

App name - NAKSport

- Ecommerce application for selling various sporting gear such as clothes, shoe, etc

android

<https://play.google.com/store/apps/details?id=com.naksport>

ios

<https://apps.apple.com/us/app/naksport/id1616217027>

App name - EzyPet

- Application for pet owners where they can search nearby spa, hotel, etc and track medical records
- Built with react native and Laravel and REST api integration
- Integrated with Adsmob, firebase, google, apple and facebook signin.

ios

<https://apps.apple.com/app/ezyvet/id6504876526>

Applications that are using internally in Philippine

Vending Machine App

- A vending machine application that sell food and drink, run on android device and communicated using serial port and include qr, contactless card payment
- Currently running in a few shopping mall at Makati City

Mobile POS

- POS application that's was specifically built for Sunmi P2 Pro (handheld pos device), integrated with built in payment, scanner, printer hardware. Developed react native payment library for contactless card payment

Desktop POS

- Specifically built for android based desktop POSw (Sunmi D2s Combo). Integrated with built in printer, cash drawer, and external devices such as Sunmi Blink QR reader, ACS card reader

Driver App

- An application made for driver and delivery men. track and report location using device gps

Bus Ticket Validator App

- Application made for bus driver to validate ticket and print receipt.

Car Parking Management System

- Application to print qr code ticket for driver when parking and automatically calculate and collect fee when exit
- Developed two mobile applications to be used with "Sunmi p2 pro" mobile POS and integrated with printer and qr scanner
- Currently running at a few condo and housing in Philippine

Barrier Operator App

- Application made for barrier operator to manually collect cash and print receipt

Task Tracking App

- Application made for workers such as electrician, handyman, etc , used to track and report their tasks inside bus terminal and condo in Philippines
